

COMS 3157: Advanced Programming

Epilogue

John Hui

Columbia University in the City of New York
Department of Computer Science

Fall 2022

Course Recap

Every day I turn on my
silly little computer

and cast my
silly little spells

Follow the River and You Will Find the C

SIGCSE 2011 paper by Jae Woo Lee et al.

Link to paper can be found on the course homepage

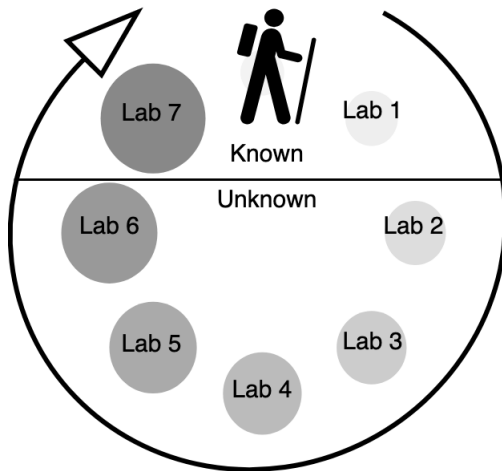

Transition from object-oriented programming to other programming paradigms

~~Read it now, and again after completing this class~~

The course, a drama

The Programmer's Journey

Lab 1: Call to adventure()

```
$ ./wordle -f words/short-list -- play
Guess:hello
__-+-
You correctly guessed 3 characters.
```

- Discovering a new programming language
- Applying prior programming experience
- Acclimating to the command line

Lab 2: Crossing the Threshold

- Separate compilation
- Bits and bytes
- Pointers and strings

Lab 3: The Road of Trials

- Heap memory management
- Data structures with pointers and structs
- Libraries and header files

Lab 4: Abyss

```
$ ./mdb-lookup mdb-cs3157
lookup: ryan
  2: {ryan} said {hi mom}
 154: {aryana} said {hi}
 367: {ryan's dad} said {what about me?}
 946: {mom} said {hi ryan}

lookup: _
```

- File streams
- Interactive I/O
- Text vs binary data

Lab 5: Apotheosis

```
--> GET /~j-hui/cs3157/index.html HTTP/1.0
--> Host: clac.cs.columbia.edu:80
-->
<-- HTTP/1.1 200 OK
<-- Date: Mon, 14 Nov 2022 11:58:17 GMT
<-- Server: Apache/2.4.52 (Ubuntu)
<-- Content-Length: 363
<-- Content-Type: text/html
<--
<-- <html>
<-- ...
```

- HTTP (client side)
- TCP connections as file streams
- Sockets API and adapting boilerplate

Lab 6: The Ultimate Boon

Hi, I'm John!

Here are facts about myself:

I've been programming since 2014:

Why do you like Pokemon so much lol

I really like pokemon:

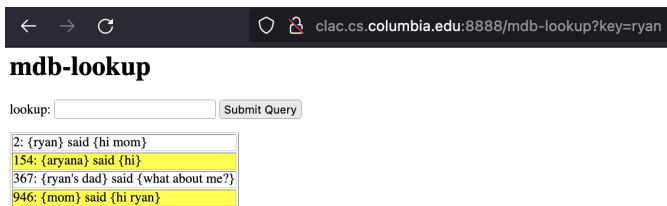

Im glad you asked

75:00

- HTTP (server side)
- C string parsing and error-handling
- Multi-processing and signal-handling

Lab 7: The Road Home

The screenshot shows a web browser window with the address bar displaying `clac.cs.columbia.edu:8888/mdb-lookup?key=ryan`. The page title is **mdb-lookup**. Below the title, there is a form with the label "lookup:" followed by a text input field and a "Submit Query" button. The input field contains the text "ryan". Below the form, a table displays the results of the lookup. The table has two columns: an index and a message. The rows are as follows:

2:	{ryan} said {hi mom}
154:	{aryana} said {hi}
367:	{ryan's dad} said {what about me?}
946:	{mom} said {hi ryan}

- Three-tier service architecture
- Dynamic web content
- Applying prior programming experience

The Road Ahead

Bytes, Pointers, and Evaluation

COMS W4115: Programming Languages and Translators

COMS W4181: Security I & COMS W4182: Security II

File and Network I/O

CSEE W4119: Computer Networks

COMS 4111: Introduction to Databases

Processes and Concurrency

COMS W4118: Operating Systems I

COMS W4113: Fundamentals of Large-Scale Distributed Systems

Completing AP

Fill out CourseWorks evaluations!

Academic honesty reminder

Do NOT upload class-related code to public GitHub repos

Acknowledgments

Faculty and Staff
